

Database Name

- Primary database: 'nextgen_admin'
- Source: API connection string default in 'WrkPlan.CustomerPortal.API/Program.cs'

Table Inventory and Usage

Table / DbSet	Purpose	Used In Project
---------------	---------	-----------------

--- --- ---

TenantRegistries \('TenantRegistry'\)	Master tenant registry \ (name, key, active status\)	Auth, Ad
TenantConnectionMaps \('TenantConnectionMap'\)	Stores tenant DB mapping	Tenant provisioning servic
Users \('AppUser'\)	Tenant user credentials	Auth login password validation, tenant creation/provis
Roles \('AppRole'\)	Role master	Schema only \ (not actively queried in current controllers\)
UserRoles \('UserRole'\)	User-role mapping	Schema only
Permissions \('Permission'\)	Permission catalog	Schema only
CustomerProfiles \('CustomerProfile'\)	Customer company profile per tenant	Dashboards, invoices, t
Contacts \('Contact'\)	Contact records	Schema only
NotificationSettings \('NotificationSetting'\)	Alert preference toggles	Schema only
Subscriptions \('Subscription'\)	Plan and billing cycle data	Hub KPIs, invoice detail fallback, su
Modules \('Module'\)	Subscription module licensing	Schema only
ServiceChangeHistories \('ServiceChangeHistory'\)	Subscription/service history	Schema only
TSIncreaseRequests \('TSIncreaseRequest'\)	Team-size increase requests	Schema only
SalesQuotes \('SalesQuote'\)	Quote records	Placeholder endpoint
SalesOrders \('SalesOrder'\)	Sales order records	Schema only
Amendments \('Amendment'\)	Commercial amendments	Schema only
AgreementAcknowledgements \('AgreementAcknowledgement'\)	Agreement acceptance history	Schema only
Contracts \('Contract'\)	Contract headers	Placeholder endpoint
ContractDocuments \('ContractDocument'\)	Contract files	Schema only
BillingContacts \('BillingContact'\)	Billing contacts	Schema only
PaymentMethodsMeta \('PaymentMethodMeta'\)	Payment method metadata	Reminder service scans this tab
Invoices \('Invoice'\)	Customer invoices	Invoice list/detail/pdf, dashboard widgets, seed/demo dat
InvoiceItems \('InvoiceItem'\)	Invoice line items	Invoice detail API
Payments \('Payment'\)	Payment transactions	Invoice detail API
PaymentEvents \('PaymentEvent'\)	Stripe webhook idempotency/event log	Stripe webhook handling
OnboardingWorkflows \('OnboardingWorkflow'\)	Workflow header	Schema only
OnboardingSteps \('OnboardingStep'\)	Workflow step rows	Progress logic uses DTO payload \ (table cu
ImplementationPlans \('ImplementationPlan'\)	JSON implementation plans	Schema only
QuestionnaireResponses \('QuestionnaireResponse'\)	Questionnaire responses and template storage	Cu
SupportTickets \('SupportTicket'\)	Customer support tickets	Ticket APIs, dashboard cards, seed/dem
TicketComments \('TicketComment'\)	Ticket comment thread	Ticket create API
Escalations \('Escalation'\)	Escalation records	Schema only
Announcements \('Announcement'\)	Tenant announcements	Announcement APIs, dashboard cards, seed/dem
ResourceFiles \('ResourceFile'\)	Knowledge/resource files	Placeholder endpoint scope
Downloads \('Download'\)	File download logs	Schema only
FeatureRequests \('FeatureRequest'\)	Feature request records	Schema only
TrainingRequests \('TrainingRequest'\)	Training session requests	Schema only
ArchiveRequests \('ArchiveRequest'\)	Archive requests	Schema only

ActivityLogs \('ActivityLog'\)	Operational activity logs	Schema only
LoginAuditLogs \('LoginAuditLog'\)	Login audit records	Audit placeholder endpoint scope
NotificationQueue \('NotificationQueue'\)	Outbound notification queue	Schema only
IntegrationEvents \('IntegrationEvent'\)	Integration event payloads	Integration placeholder scope
CustomerThemePreferences \('CustomerThemePreference'\)	Per-customer theme settings	Theme APIs/serv
TB_ERP_CLIENT_DETAIL \('TbErpClientDetail'\)	External ERP client registry	Admin ERP listing endpoi
SubscriptionPlans \('SubscriptionPlan'\)	Plan catalog	Admin plan CRUD, assignment, customer subscri
SubscriptionChangeLogs \('SubscriptionChangeLog'\)	Plan assignment audit trail	Admin change log en

Key Files Where Table Access Occurs

- 'WrkPlan.CustomerPortal.API/Controllers/ApiControllers.cs'
- 'WrkPlan.CustomerPortal.Infrastructure/Services/CoreInfraServices.cs'
- 'WrkPlan.CustomerPortal.Infrastructure/Data/SeedData.cs'
- 'WrkPlan.CustomerPortal.Infrastructure/Data/AdminDbContext.cs'

Notes

- This project uses EF Core with 'AdminDbContext' as the central schema map.
- Several tables are currently defined for full platform scope but not yet actively queried by live UI/A
- 'TB_ERP_CLIENT_DETAIL' query includes a fallback to fully qualified '[nextgen_admin].[dbo].[TB_ERP_CLI
